About Me

B.Tech graduate in Computer Science with a strong foundation in full-stack web development. Proficient in JavaScript, TypeScript, React, Node.js, and modern development tools such as Git ,MS Excel etc. Proficient in Machine Learning with hands-on experience in building and training CNN-based models using TensorFlow and Keras for real-world image classification tasks. Passionate about crafting clean, maintainable code and delivering high-performance web solutions. Seeking a Software Developer role to contribute to impactful projects and grow as a full-stack engineer.

Skills

Programming Languages: Python, JavaScript, C++, TypeScript, C# **Web Development:** React.js, Next.js, HTML5, CSS3, Tailwind CSS **Backend Development:** Node.js, PHP
Databases: PostgreSQL, MongoDB, MySQL
AI & Data Science: GPT-based AI, NumPy, Pandas, Matplotlib, Streamlit

Education

Bachelor of Technology in Computer Science and Engineering **2021 - 2025 | CGPA: 8.64**

- *Assam Science and Technology University, Guwahati, Assam*

CBSE (Class XII) **2019 - 2021 | *Aggregate: 88.2 %***

- *Gurukul Grammar Senior Secondary School, Guwahati, Assam*

Projects

University Alumni Association Website

- Designed and deployed the official alumni portal for the university, serving 1,000+ users.
- Used MERN stack to build features like event listings, alumni registration, and donation tracking.
- Collaborated with university stakeholders to ensure usability and engagement.
- Delivered the project on schedule while leading a small development team.

Live Site: https://alumni.gcuniversity.ac.in/

Full Stack Messenger App

- Built a real-time messaging platform using **Next.js**, **Prisma**, and **Socket.io**, enabling instant chat and dynamic server updates.
- Implemented secure authentication and user management using **Clerk**, with protected routes and role-based access control.
- Integrated **WebRTC** for peer-to-peer video conferencing, supporting live audio/video communication within channels.

GitHub: https://github.com/JyotirmoyBarman/Full-Stack-Messaging-App

Plant Disease Detection using CNN

- Developed an image classification model using **TensorFlow** and **Keras** to detect plant diseases from leaf images.
- Designed and trained a **Convolutional Neural Network (CNN)** with data preprocessing and augmentation to improve accuracy and reduce overfitting.
- Evaluated model performance using accuracy/loss metrics and deployed predictions through a simple user interface for real-time disease detection.

Leadership & Volunteering

Coordinator, GCU Gameathon – 2025

- Organized and managed the university's premier gaming event, facilitating participation from 100+ students.
- Coordinated with sponsors, mentors, and faculty to ensure a smooth execution of the event.
- Assisted in curating problem statements and mentoring participants during the event.
